**HARVARD**  
MEDICAL SCHOOL

Dear Colleague,

Much has changed in the field of obstetrics and gynecology in the past year, with significant implications for clinicians.

I invite you to attend the Harvard Medical School annual update on diagnosis and treatment of reproductive health conditions in women: Obstetrics and Gynecology 2015. When we meet in Boston in March 2015, Harvard's leading clinical faculty will share updates and important new information, including:

- A one-step approach to resolving a difficult shoulder dystocia (deliver the posterior arm)
- How to use letrozole to induce ovulation in infertile women
- Options for minimizing the use of medroxyprogesterone acetate in menopause treatment
- New approaches to tissue extraction during gynecologic surgery
- New norms for managing labor
- Pap smear and/or HPV testing? Where are we heading?
- Non-hormonal treatment of menopause symptoms
- Strategies to increase the use of long-acting reversible contraceptives
- Increasing the use of therapeutic hypothermia for newborns
- How to manage vaginal mesh problems

We pair these updates with specific clinical guidance that you can put to use immediately in your day-to-day practice.

The lectures, interactive discussions and in-depth clinical skills workshops at Obstetrics and Gynecology 2015 are led by more than 50 master clinicians, all at the forefront of their respective subspecialties. You will also have the opportunity to customize your learning experience for your specific practice needs — see the agenda for details.

I hope you will join us March 15-20 in Boston for Obstetrics and Gynecology 2015.

Sincerely,

### Robert L. Barbieri, MD

*Chairman, Department of Obstetrics and Gynecology,

Reproductive Biology, Harvard Medical School*

# COURSE OBJECTIVES

## Clinical Obstetrics

**Upon completion of this course, participants will be able to:**

- Determine the rationale for prenatal diagnosis, current screening and diagnostic techniques including ultrasound.
- Develop treatment plans for the management of antepartum complications, including infectious disease, multifetal gestations, obstetrical emergencies, cervical incompetence and preterm labor.
- Analyze the current management of maternal complications of pregnancy.
- Outline the role that obstetricians play in adverse neonatal outcomes.

## Minimally Invasive Gynecologic Surgery — Urogynecology — Gynecologic Oncology

**Upon completion of this course, participants will be able to:**

- Enhance their knowledge base and skills as they manage patients with neoplastic disorders and non-malignant conditions. Develop new strategies to apply in practice for the management of neoplastic disorders and non-malignant conditions.
- Review the current surgical management of invasive female tumors.
- Evaluate the non-surgical management of malignant and non-malignant gynecologic tumors.
- Adopt procedures to improve early detection of female genital and breast cancers.
- Utilize current gynecologic surgical techniques, including laparoscopy and hysterectomy, and assess indications for use and how to manage complications.
- Analyze the latest trends in minimally invasive gynecologic surgery and how they may impact the care of your patients.
- Apply practical surgical tips in minimally invasive gynecologic surgery.
- Improve their knowledge and skills in lower urinary tract physiology, pelvic anatomy and vaginal hysterectomy.
- Appropriately manage patients with urinary incontinence and pelvic organ prolapse.
- Review the most up-to-date evidence in the use of slings for the management of stress urinary incontinence, and pessaries for prolapse.
- Apply practical surgical tips in the management of urogynecologic complications.

## Reproductive Endocrinology and Infertility

**Upon completion of this course, participants will be able to:**

- Analyze advances in the field as they apply to the management of patients with endocrine and fertility disorders. Incorporate new management strategies for patients with endocrine and fertility disorders.
- Develop techniques to evaluate pelvic pain and bleeding and strategies for managing them.
- Institute a therapeutic management plan for patients with non-menopause-related endocrine imbalance, as well as those who are menopausal and post-menopausal.

## ACCREDITATION:

The Harvard Medical School is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. The Harvard Medical School designates this live activity for a maximum of 42.25 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

- Full Course: A maximum of 42.25 AMA PRA Category 1 Credits™
- Clinical Obstetrics: A maximum of 14.25 AMA PRA Category 1 Credits™
- Minimally Invasive Gynecologic Surgery, Urogynecology and Gynecologic Oncology: A maximum of 16.0 AMA PRA Category 1 Credits™
- Reproductive Endocrinology and Infertility: A maximum of 12.0 AMA PRA Category 1 Credits™

This activity meets the criteria of the Massachusetts Board of Registration in Medicine for 6.00 credits of Risk Management Study.

The Royal College of Physicians and Surgeons of Canada recognizes conferences and workshops held outside Canada that are developed by a university, academy, hospital, specialty society or college as accredited group learning activities.

Application for assignment of **ACOG Cognate Credits** has been filed with the American College of Obstetricians and Gynecologists and is currently pending. Check the course website for updates.

AMA PRA Category 1 Credits™ claimed by physicians attending live events certified and organized in the United States for AMA PRA Category 1 Credits™ can be claimed through the agreement on mutual recognition of credits between UEMS and AMA, considered as being equal to the European Continuous Medical Education Credits (ECMEC©) granted by the UEMS. One AMA PRA Category 1 Credit™ is equivalent to one (1) hour of European EACCME Credit (ECMEC©), therefore up to 42.25 ECMEC© Credits are available. Each medical specialist should claim only those hours of credit that he/she actually spent in the educational activity.
